“ *The community has lost a light and a genuine pillar all too soon. My first memory of Stephen was vending at Fall Fling where he saw me wandering around the drum circle and then just handed me a drum from the Bio-Buzz tent. No questions asked, just a request to "put it back whenever". That was my first legit drum circle, and it marked a turning point.*

*I'm now a seasoned percussionist and have hosted numerous drum circles since that day. At each one, he was always in the back of my mind as I tried to do his generosity justice, supplying drums to anyone without, in what's become a personal tradition.*

*There are myriad of stories I could share since then, but that one has always stuck with me because I owe him the debt of personal growth and coming to know myself better. Thank you, Stephen for all you did for me and for this community. You will be missed beyond words. Fare thee well.*

*The Last time I saw Stephen was when he was smiling and pointing at me across the street at the Christmas Parade in Auburn several years ago. He had always been nice to me and stuck up for me when I could not stick up for myself. I never got to know him very well, but I do know that he was a kind soul.*
